

Cyber Security Checklist

- Perform Regular Vulnerability Scanning**
Perform regular vulnerability scanning to identify and address vulnerabilities before they can be exploited.
- Conduct Regular Incident Response Drills**
Conduct regular incident response drills to test your organization's incident response procedures and identify areas for improvement.
- Implement Multi-Factor Authentication (MFA)**
Implement MFA to add an extra layer of security when accessing sensitive data or systems.
- Monitor and Control Physical Access**
Monitor and control physical access to your organization's data centers, server rooms, and other critical areas.
- Implement a Least Privilege Model**
Implement a least privilege model to ensure that employees only have access to the resources necessary to perform their job duties.
- Develop a Social Engineering Awareness Program**
Develop a social engineering awareness program to educate employees on how to identify and prevent social engineering attacks.
- Monitor and Audit User Activity**
Monitor and audit user activity to detect and prevent insider threats and unauthorized access to sensitive data.

- Conduct Regular Security Awareness Training**
Conduct regular security awareness training to keep employees informed about the latest security threats and best practices.

- Implement Endpoint Security Controls**
Implement endpoint security controls, such as antivirus and endpoint detection and response (EDR) solutions, to protect against malware and other endpoint-based attacks.

- Establish a customer service plan**
Develop policies and procedures for addressing customer complaints and providing excellent customer service.

- Use Secure Remote Access Tools**
Use secure remote access tools, such as remote desktop gateways and virtual private networks (VPNs), to provide secure remote access to your organization's network.

- Perform Regular Business Continuity Planning (BCP)**
Perform regular business continuity planning to ensure that your organization can continue to operate in the event of a security incident or other disruption.
